

## Change Individual Student's Grades

Go to Classlist Editor

For the student of interest click on assigned problems. This gives a list of all problems and notes the ones assigned to the student by a check in the box of the problem set.

From this page you can change the open, due and answer dates for a signal student.

If you wish to change grades or other parameters, click on the Problem set (in 2<sup>nd</sup> column).

Scrolling down, you can see that you can change: seed, status, weight, max attempts for a single problem. Status is the grade as a fraction of 1, e.g., 0.75 is 75% correct on that problem.
