This gives a list of the students in the section you wish. Highlight them all. In the right-hand window, you can click on one problem set (we'll use ECE220_Homework_5_blh in this example) then click the button towards the bottom of the page that says "Edit one set for users" and then you can change the due date for that group of students.

Note: The problem set must be assigned to the students before you can set the open and due dates. You can assign the problems to the whole class if you like, setting the open and due dates as a default for the class and changing it on the Instructor Tools page. Alternatively, you can assign the problems on the Instructor Tools page for each section by clicking the button "Assign selected users to selected sets"
